## NEW AUTOMATIC PRESSURE MONITOR COMBINES DURABILITY WITH EASE OF OPERATION

Brecksville, OH—Hyson Products introduces the APM-5800 Automatic Pressure Monitor that tracks nitrogen gas pressure in manifold and hosed gas spring systems. Each unit comes complete with the automatic pressure monitor, cable and protective cover.

The APM-5800 Automatic Pressure Monitor offers a wide measuring range, detecting pressure from 0-400 bar/0-5800 psi. Extremely durable, it features a 316 stainless steel process connection contained in a housing less than three inches long. There are no moving parts and LEDs provide status so no calibration is required. The unit sets up simply by adjusting the dials to select set point and reset point. Its high accuracy and long-term stability ensure that the set point does not drift. A locking device protects against unintentional set point changes.

Hyson Products is a division of Associated Spring, a business unit of Barnes Group Inc. (NYSE:B) Hyson Products designs and

manufactures Super Tanker® high performance gas springs, and T2 and T3 standard gas springs; Nitro-Dyne® XP manifold systems and accessories; the Dyne-A-Cam® Series of cams; and the DRAC® Series of delayed return manifolds in an ISO 9001-2000 certified facility.

Barnes Group Inc. ([www.barnesgroupinc.com](http://www.barnesgroupinc.com)) is a diversified international manufacturer of precision metal components and assemblies and a distributor of industrial supplies, serving a wide range of markets and customers. Founded in 1857 and headquartered in Bristol, Connecticut, Barnes Group consists of three businesses with 2005 sales of \$1.1 billion: Barnes Distribution, an international, full-service distributor of maintenance, repair, operating and production supplies; Associated Spring, one of the world's largest manufacturers of precision mechanical and nitrogen gas springs and a global supplier of retaining rings, reed valves, shock discs, and injection-molded plastic components; and Barnes Aerospace, a manufacturer and repairer of highly engineered assemblies and components for aircraft engines, airframes, and land-based industrial gas turbines. Over 6,500 dedicated employees at more than 60 locations worldwide contribute to Barnes Group Inc.'s success.
