FOR IMMEDIATE RELEASE  
August 25, 2007

### BROCHURE DESCRIBES DI-DRO ADVANCED FORMING SYSTEMS

Brecksville, OH—Hyson<sup>®</sup> Products issues literature on the Di-Dro Advanced Forming System, the latest in its expanding line of controllable products that includes the CS2 nitrogen gas springs, and DRAC<sup>®</sup> and DRAC<sup>®</sup>2 delayed return manifolds. The Di-Dro is a hydraulic manifold that combines high force in a small space, especially important in transportation and other industries that use higher strength steels.

The four page color brochure details the features and benefits of the Di-Dro Advanced Forming System, including providing controllable pad delay to prevent distortion and allow multiple operations to be performed in a single press, adjustable force, constant force throughout the stroke, and applicability for both lower and upper applications.

Components of a standard system as well as a delayed return system are listed, and application examples are included

~ MORE ~

showing a fuel tank stretch form, step draw, and high strength steel forming.

Hyson Products designs and manufactures Tanker<sup>RT</sup> and Tanker<sup>RS</sup> high force and high performance gas springs, and T2 and T3 standard gas springs; Nitro-Dyne<sup>R</sup> XP manifold systems and accessories; the Dyne-A-Cam<sup>R</sup> Series of cams, and the DRAC<sup>R</sup> Series of delayed return manifolds in an ISO 9001-2000 certified facility.

Celebrating its 150<sup>th</sup> anniversary in 2007, Barnes Group Inc. (NYSE:B) is an international aerospace and industrial components manufacturing and distribution company focused on achieving consistent, sustainable and predictable results. Founded in 1857, Barnes Group consists of three businesses: Barnes Aerospace, Barnes Distribution, and Barnes Industrial. Over 6,600 dedicated employees at more than 65 locations worldwide contribute to Barnes Group Inc.'s success. The Company has paid cash dividends to stockholders on a continuous basis since 1934.
