FOR IMMEDIATE RELEASE
November 4, 2005

NEW BROCHURE DETAILS T2SL SERIES STOCK LIFTERS
WITH T2SL-170 AND T2SLM-300 MODELS

Brecksville, OH – Hyson Products issues new literature on the T2SL Series of stock lifter gas springs, designed for part lifting in transfer and progressive die applications. Hyson Products is a division of Associated Spring, a business unit of Barnes Group Inc. (NYSE:B)

The four-page brochure provides information on dimensions, force ranges and ordering for the T2SLM-300 model as well as the new T2SL-170 that is available with either a threaded piston rod or a slotted top plate for flexibility in mounting. Both T2SL-170 versions can be used in self-contained mode or hosed system modes. Also highlighted are features, from all metric interfaces and an easily adjustable force to a double tube design that isolates the gas spring from side load and fluid contamination.

Hyson Products designs and manufactures Nitro-Dyne® XP manifold systems and accessories, Super Tanker® high performance gas springs with dynamic lubrication, T2 and T3 nitrogen gas springs, the Dyne-A-Cam® Series of cams and the DRAC® Series of delayed return manifolds in an ISO 9001:2000 certified facility.

Barnes Group Inc. (www.barnesgroupinc.com) is a diversified international manufacturer of precision metal components and assemblies and a distributor of industrial supplies, serving a wide range of markets and customers. Founded in 1857 and headquartered in Bristol, Connecticut, Barnes Group consists of three businesses with 2004 sales of \$994.7 million: Barnes Distribution, an international, full-service distributor of maintenance, repair, operating and production supplies; Associated Spring, one of the world's largest manufacturers of precision mechanical and nitrogen gas springs and a global supplier of retaining rings, reed valves, shock discs, and injection-molded plastic components; and Barnes Aerospace, a manufacturer and repairer of highly engineered assemblies and components for commercial and military aircraft engines, airframes, and land-based industrial gas turbines. Over 5,900 dedicated employees at 60 locations worldwide contribute to Barnes Group Inc.'s success.
