FOR IMMEDIATE RELEASE
July 3, 2007

NEW BROCHURE AVAILABLE ON HIGH PERFORMANCE TANKER®T and TANKER®S GAS SPRINGS

Brecksville, OH—Hyson Products, a business of Barnes Group Inc., issues literature on the Tanker®S and Tanker®T (TNKS and TNKT), the latest generation of the Tanker® gas spring series originally introduced in 1985. The new springs offer high force in a short height with contact forces from 2,200 to 15,400 lbs. and full stroke forces from 3,900 to 27,600 lbs.

The 24-page color brochure details the advantages of these high performance gas springs from the patented dynamic lubrication to reduce heat build-up and extend spring life, to the bore seal to resist contamination and rod damage, and from the corrosion-resistant nitrided rod, self-aligning to accept normal die movement and a degree of sideload without damaging cylinder seal surface, to the long stroke lengths to 225mm/8.86 in.

~ MORE ~

Product specifications, dimensions, force charts, accessories, mounting options and ordering information are included for each model.

Hyson Products designs and manufactures Tanker[®]T and Tanker[®]S high force and high performance gas springs, and T2 and T3 standard gas springs; Nitro-Dyne[®] XP manifold systems and accessories; the Dyne-A-Cam[®] Series of cams, and controllable systems that include the DRAC[®] Series of delayed return manifolds and the hydraulic Di-Dro advanced forming systems in an ISO 9001-2000 certified facility.
